ALLOWANCE

Reasons for Allowance

Claims 2-14, 26-30, 33-38 and 41-45 are allowed.

As to claims 7 and 33, no prior art was found to show or suggest an apparatus as claimed with a wand assembly including a buffer container and an extendable grip in the claimed environment.

As to claim 26, no prior art was found to show or suggest a biological sampling method as claimed including a step of extending a grip on the wand, moving the wand by executing two whip actions, and retracting the grip on the wand in the claimed environment.

The Schramm and DiCesare references each disclose a swab assembly comprising a reagent chamber and a sample tube, as well as a wand assembly including a buffer container. Schramm and DiCesare do not disclose that the wand assemblies have extendable grips capable of facilitating a whipping action.

Zhou (US 20040184966) discloses a biological specimen collection device with a telescoping grip. The telescoping grip is connected to the handle portion attached to the sample collection swab, and allows the user to access remote samples due to the extension of the grip. Accordingly, this extendable grip is not on the wand assembly. Furthermore, Zhou is not available prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Double Patenting

Provisional Obviousness-type Double Patenting rejections over copending U.S. Application No. 10/852,684 set forth in the previous Office Actions have been withdrawn since they are the only rejections remaining in the application, and since the instant application is the earlier filed of the two pending applications. This is in accordance with MPEP 1490.
